Exam in Operating Systems

Course
- Operating Systems I (1DT044), 5c
- Operating Systems with project (1DT039), 10c
- Operating Systems with project (1DT040), 15c
- Computer Systems DV1 (1DT151), 15c

Date 2010-03-18
Time 08:00 – 13:00
Aids Course book, Lecture notes and slides, Calculator
Teacher Lars-Åke Larzon, tel 018-471 2781
Scheduled teacher pass-by: 09:30, 11:30

Instructions

Write easily readable, concise answers that do not diverge from the subject of the questions and only give one answer to each problem. Unreadable, unclear and unrelated answers will result in lesser points.

If details are missing from a problem, make a reasonable assumption and present that assumption clearly as part of your answer.

The exam consists of three parts worth 20 points each. In order to pass this exam, you must:
- Get at least 8 points on each part of the exam
- Get at least 30 points in total

Exam grades will be based on the average score on the three parts as follows:

0 – 11 pts => Fail, 10 – 14 pts => 3, 13 – 18 pts => 4, 17 – 20 pts => 5

If you have 10-11, 13-14 or 17-18 points the overall impression of your exam as a whole will determine whether you get the higher or lower grade for that score. Also, please note that exam grade is not the same as course grade – course grade take other parts of the course into account as well.

Good luck!
