Answer the following questions, make a pdf file and mail it as an attachment to:

netcourse.tnuu@analys.orkund.se

1. What are the most important moral issues and conflicts related to research in natural sciences and technology? Give some examples and discuss why they emerge and why they are important. Choose the most important one according to you, analyze it and propose a well-grounded solution (no less than 500 words, no more than 1 000 words).
2. Ethical codes and guidelines are today necessary in supporting ethical behavior in research. Discuss how ethical codes and guidelines should be constructed and what is demanded for them to have a value in real-life research work (no less than 500 words, no more than 1 000 words).
