(3a) NFA Determinization
Exercise A

Carl Leonardsson

2013-12-11

Use the Powerset Construction method to determinize the NFA below.

- Mark all DFA states with the corresponding set of NFA states.
- Garbage states, if reachable, should be **explicit**.
- Unreachable states need not be computed or drawn.
- The alphabet is the set of all symbols labelling the NFA transitions. (ϵ is not a symbol, as usual).
