PH.D. POSITION / DOKTORANDTJÄNST

Wireless communication security

The PhD position is with the Communications Research group at the department of Information Technology. The group is doing research within mobile and wireless computer communication, Ad hoc networks, Delay Tolerant Networking, Wireless Sensor Networks and wireless security. Our approach is mainly experimental and we build research prototypes.

The position is initially within a VINNOVA funded research project on mobile peer-to-peer security. The candidate should be able to start during the Spring semester of 2006.

For additional information on the research activities, please see the Communication Research group web page and the department of Information Technology web page or contact professor Per Gunningberg, phone +46 18 471 3171, e-mail: Per.Gunningberg@it.uu.se.

For more general information about graduate studies, how to apply and required qualifications, see the department graduate studies web pages or contact the director of graduate studies Bernhard Müller, Bernhard.Muller@it.uu.se.

The application should be addressed to Institutionen för Informationsteknologi, Professor Per Gunningberg, Box 337, 751 05 Uppsala, Sweden, no later than March 27, 2006.
