

Workshop on Professional Competencies

April 8, Polhemssalen, Ångström

Professional competencies, what they are and how they can be addressed in education, are of high importance for all involved in education relevant, maybe especially for students. This workshop is given by a set of international experts and will cover the following areas:

Christina Dörge
Oldenburg University,
Oldenburg, Germany

*Competencies and skills:
Filling old skins with new
wine*

Steve Seidman
Texas State
University, Texas, USA

*Demonstrating the
attainment of professional
competencies*

Roger McDermott
Robert Gordon University,
Aberdeen, Scotland

*Ways in which students'
reflective analysis of their
own learning can be
incorporated into the
undergraduate curriculum*

Brian von Konsky
Curtin University,
Perth, Australia

*The identification,
development and
presentation of
professional skills*

Niclas Andersson and Pernille Andersson
DTU, Copenhagen, Denmark

*Teaching professional engineering skills - Industry
participation in realistic role play simulation*

More information about the workshop and how to register is available at
