Group 2 Seeing While Walking

Yang Wenlan
Gao Chenyan
Cui Shenshen
Jin Chuan
Wu Xue

Accomplished this week

- We fix the problem about combination programs of walking and getting images. So far we can just approach the one image in the browser while clicking the “refresh” button. But there’re functions in OPEN-R that could get continuous pictures.

Plans for next week

- Try to test how to real-time images and collect data into memory stick.
