Group 2 Seeing While Walking

Yang Wenlan
Gao Chenyan
Cui Shenshen
Jin Chuan
Wu Xue

Accomplished this week

- This week, we do some integrated testing on what we have done so far. Images can now be both saved into AIBO’s memory stick and computer disk through wireless network with a relative acceptable rate. However due to the Easter, we haven’t do much this week.

Plans for next week

- Integrate our programs with Group 1’s gait
- Measure head shaking through image analysis and estimate the values we use to tune the neck joint
