Group 2 Seeing While Walking

Yang Wenlan
Gao Chenyan
Cui Shenshen
Jin Chuan
Wu Xue

Accomplished this week

- This week, we have integrated group 1’s gait into our programs successfully. Now we are able to do the image analysis based on this more stable walking style in an offline way.
- We take several pictures in eight different states and try to change the angle of the neck joint within varying time.

Plans for next week

- Try to finish what we left
- Evaluate different situations with our new gait-head solution
